

**CHECKLIST #0415 FOR THE APPROVAL OF:
FENCES, POLES & EQUIPMENT SUPPORT STANDS**

- ☐ Basic Requirements Checklist.
- ☐ One set of the manufacturer's 'approval document'.
- ☐ Calculations verifying that product including footing and anchorage can withstand all applicable forces set forth in the SFBC.
- ☐ One set of manufacturer's design drawings marked and verified by the testing laboratory.

The following current laboratory tests and test reports in compliance with protocol PA 301.

- ☐ Gravity load test per chapter 23. The test load shall be 1.5 the design load. All components will be uniformly loaded for a period of 24 hours. Three specimens must be tested. Fence specimen shall consist of 3 post minimum. If the cross section area of specimens are not symmetrical, the test must be performed on both directions.

Note:

If product has plastic as a component, add the plastic checklist to these requirements.
